Watery, dries quickly, and does not leave a sticky film. *Scented.*

Feel &
Scent

Watery, dries quickly, and does not leave a sticky film. *Unscented.*

Both products are alpha hydroxyl acids that exfoliate the skin. Both have ingredients with anti-inflammatory, antiseptic, skin lightening, and healing properties. Both have humectants to moisturize the skin. There are some unique ingredients in each that should be considered. The Ordinary Glycolic Acid 7% Toning Solution is stronger and less expensive than the Pixi Glow Tonic.
